

THE BRADBURY CO., INC.

# Hydraulic Long Folders

**We developed the Bradbury long folder by listening to our customers and consulting experts in the field.**

Available in 13', 21', 26', 33', and 40' lengths.

## Production & Safety Features

- Variable speed hydraulic power unit provides quick performance for productivity, smooth operation to reduce shock on components, and energy savings when the folder is idling between folding operations.
- Two position back gauge increases machine flexibility and cuts travel time.
- The hybrid fingers™ provide positive edge contact and consistent part alignment.
- Hydraulic links, spaced along the folding bed, create uniform force with smooth action.
- Safety stop for upper jaw can be programmed for local regulations.
- Full length emergency kick rail provides e-stop and lock shutdown.
- Emergency stop foot pedals are supplied for each of two operators.
- Many additional safety features.

Bradbury folders come with the Beck Automation Intelli-Fold™ Controller featuring selectable bend allowance, material thickness adjustment, and compact flash memory for easy data back up and transfer. The controller is preloaded with a library of standard trim parts, has touchscreen editing to create new parts, and a graphic display that illustrates how to position the blank while forming the part.
