

THE

STR™ - Telescopic Rollformer

Exclusively by Bradbury

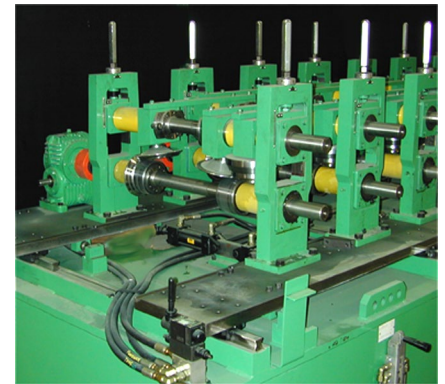

Bradbury – The World's most experienced manufacturer of Rollformers for the Garage Door Industry!!

Safety guards have been removed from photo to better view products. All safety guards should remain in place when using Bradbury equipment.

The STR™ - Telescopic Rollformer Features

- Telescopic thru shaft design is required for critical sections with close tolerances
- Infinitely variable positive width adjustment
- Integrated telescopic roll tooling technology resulting in superior first part accuracy & less scrap
- Decreased setup / Increased production
- Fewer adjustable parts compared to duplex design resulting in less maintenance
- Bardie™ cartridge for automatic gauge change
- Gear driven stations for high torque / high speed applications
